The Thomas H. Manning fund, a special fund of the OFNC, established in 2000 from the bequest of northern biologist Thomas H. Manning (1911–1998), provides financial assistance for the publication of papers in the CFN by independent (non-institutional) authors, with particular priority given to those addressing arctic and boreal issues. Qualifying authors should make their application for assistance from the Fund at the time of their initial submission.

COVER: Three species of shorebirds in the St. Lawrence River estuary at Kamouraska, Quebec, Canada: 13 Black-bellied Plovers (*Phuvialis squatarola*); two Red Knots (*Calidris canutus*; middle and bottom, walking to the right and behind vegetation); and a Short-billed Dowitcher (*Limnodromus griseus*; with beak under wing).
