Washington, DC. Registration is currently open. More information is available at <https://www.mammalmeetings.org/>.

Release of Flora of Newfoundland and Labrador webpage

A comprehensive treatment of the vascular flora of Newfoundland and Labrador was posted online by Susan J. Meades and William J. Meades in late 2018: <https://newfoundland-labradorflora.ca>. It is based on the authors’ decades of experience on “The Rock”, as well as the borrowed expertise of other local and “From Away” field botanists. All species, subspecific taxa, and named hybrids known from here are listed and a statement on their status is provided. Technical descriptions of some taxa are included with the expectation, over time, of providing this feature for all species in the *Flora*. Keys to the species of all major families are includ-

ed as are exhaustive enumerations of synonyms. The latter may seem out of place in a regional study but the complex taxonomic history of this area’s flora—particularly in light of the prolific taxonomic publication of “splitters” like M.L. Fernald and associations in the early 20th Century—make this a valuable addition. This independently supported, constantly updating floristic resource will be of great value to all field botanists active or interested in this area.
